

BCAA Blast

BCAA Blast is a blend of 5000mg of Branched Chain Amino Acids and Glutamine for lean muscle and recovery. BCAAs are the most abundant amino acids found in muscle tissue, and are the most readily absorbed group of amino acids. BCAA Blast contains the ideal ratio of 2 parts Leucine to 1 part Isoleucine and Valine.*

These amino acids increase protein synthesis and nitrogen retention, both essential to building lean muscle. BCAAs are metabolized directly in the muscle, and are considered “essential” because the body cannot build them from other compounds. Instead, they must come from diet or supplementation. Take your results to a whole new level with this great tasting drink. *
